

GRAIDCO

GLOBAL RELIEF, AID & DEVELOPMENT COMPANY

Industrial Kitchen & Catering Equipment

About GRAIDCO

GRAIDCO (Global Relief Aid and Development Company) has extended their range of products and services for the Industrial Kitchen Equipment division. During the last 2 years **GRAIDCO** has closely co-operated with their several suppliers in order to bring this specific activity to the next level. This has resulted in a wider assortment of equipment and some project concepts that can be utilized for different applications.

Next to our regular supplies for a wide variety of Kitchen and Catering Equipment, we have now also looked at the possibilities for supplying this equipment on a project basis for the sectors as mentioned below. Where we can also look at the possibility for a turn-key approach, meaning that we can do; consultancy, supply of equipment, installation, commissioning and training.

Refugee Camps

After a disaster people are often displaced from their homes and put into temporary camps. Since the shelters only provide limited facilities for home cooking. It is often essential that a central kitchen facility is established, that can produce basic meals in relatively big quantities, several times a day. **GRAIDCO** can provide several solutions for this, which can be in the form of a fully equipped camp kitchen housed in a professional tent structure or a modular sandwich panel construction or by means of a professional mobile field kitchen.

Remote Camps for Workers

Often construction, mining and oil/gas plants are located in remote areas where the workers stay in special fully accommodated camps for a longer period. The available dormitories itself mostly do not foresee in any other facilities. This means that these workers will need to have access to professional catering and laundry services. **GRAIDCO** can offer a turn-key solution in the form of a fully equipped kitchen, canteen and laundry facilities. When required **GRAIDCO** can also take care for the installation and commissioning of this equipment.

UN Field Missions

There are over 130 UN field offices, which include peacekeeping, political, humanitarian and specialized offices. Often these field offices have their own canteen facilities with suitable catering services to provide their employees with a full selection of meals and drinks during lunch and coffee breaks. **GRAIDCO** can provide the full range of equipment to fully equip the canteen and the kitchen. Next to the above **GRAIDCO** also offers the full range industrial kitchen and food production equipment for projects that are implemented by the UN in different sectors in developing countries and upcoming markets.

Education and Training Projects

GRAIDCO has developed several solutions for education and training projects in developing countries that involve any type of kitchen, catering or canteen equipment. For these projects we have distinguished two major types of projects.

Provision of industrial kitchen equipment to school canteens and restaurants

Many schools in developing countries have student dormitories and have the responsibility to provide students with proper boarding facilities. As such they offer students the possibility to have a proper meal during lunch and dinner time. For these schools **GRAIDCO** offers the full range of kitchen, catering and canteen equipment.

Hotel and tourism training centres

GRAIDCO has developed several concepts for the turnkey development and implementation of centres of excellence for the Hotel and Tourism sector. These concepts are based on creating a real life practical learning environment reflecting all aspects of this sector and include training and demonstration facilities like; professional kitchen, restaurant, bar, reception, housekeeping, hotel rooms, laundry and dry-cleaning, etc.

Refugee Camp Projects

Refugee camps are normally temporary based, however reality has learned that these camps more and more get a semi-permanent character. Since these camps are also becoming bigger and bigger, they also need to have professional facilities for the refugees. Together with several partners **GRAIDCO** has developed several concepts for customized prefabricated modular based community accommodations, which can also be used for refugee camps. Prefabricated modular structures minimize the construction time and cost, whereas the faster the buildings can be used, the sooner the operations can be begin. In this context we have been involved with our Turkish partners in establishing and equipping the Biggest Syrian Refugee Camp in Turkey. Assuring that the refugees have access to multiple meals a day and the lack of cooking facilities in the shelters requires a professional solution for big scale food preparation and distribution. **GRAIDCO** has the full range of professional kitchen and catering equipment available for these purposes. This equipment can be integrated in the existing facilities or we can provide fully self-supporting modular or mobile kitchen and bakery units.

Next to these solution **GRAIDCO** also offers other products that can be used for refugee camps:

- Professional laundry equipment
- General relief goods
- Basic shelter furniture
- Dormitory furniture
- Waste collection equipment

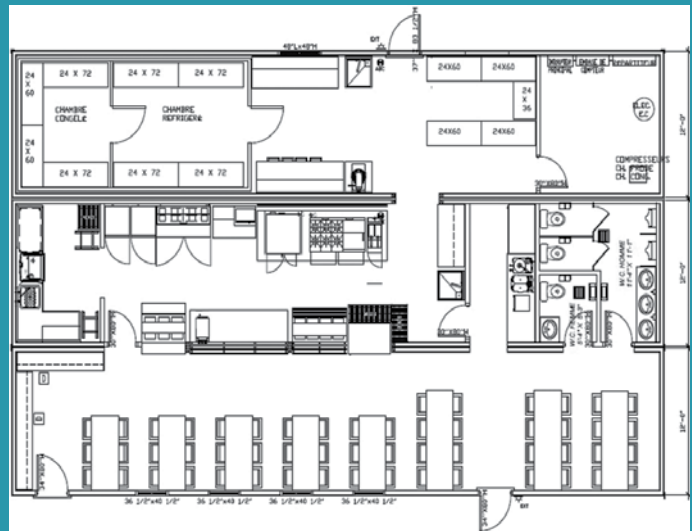

Remote Camps for Workers

GRAIDCO together with their partners have developed several turn-key concepts for establishing professional remote camps for workers in the; construction, mining, oil and gas sector. Several solutions can be offered. Considering the remoteness of these areas, the limited facilities available in the dormitories, the fact that workers often work in 2-3-4 shifts and stay in the camps for a longer period. There is a big requirement to offer the workers professional facilities to make their life as easy as possible when they are not working.

For these purposes **GRAIDCO** offers to supply the full range of:

- Kitchen and catering equipment
- Laundry equipment
- Dormitory furniture
- Recreation room furniture and equipment
- Gym equipment

This equipment can be integrated in the existing facilities or we can design fully stand-alone units based on modular units, 20/40-ft containers of mobile versions.

United Nations Field Missions

The United Nations (UN) has a big number of different operations worldwide. These can vary from specialized offices like ; UNICEF, UNESCO, WFP, WHO, FAO, UNDP etc. to Peace Keeping Missions and Political and Economic Offices. As such the UN employs a lot of people worldwide. Particularly the Peace Keeping Missions often operate on camp type basis away from city centres and facilities. Typical for these operations **GRAIDCO** offer the full range of industrial kitchen and catering equipment, which can be integrated in the existing facilities. Or **GRAIDCO** can design and supply a fully self-supporting unit. In addition **GRAIDCO** also provides the full range of equipment for the canteens and also professional laundry or semi automatic operated machines can be supplied as standalone units or as a 20-ft or 40-ft containerized version ready for use.

United Nations Agro Business Development Projects

Several specialized UN agencies implement worldwide projects that are related to any form of food technology, processing and production. One of the major programs under which these project are implemented are the so called Agro Business Development Projects. These projects can vary from the development of small bakeries, small pasta factories, fruit and vegetable processing to different kind of end products, fish and meat processing, cold chain storage, etc. including the packing into consumer portions. **GRAIDCO** can provide a full range of equipment for these purposes from very small scale manual or semi-automatic operated to fully automated versions, including the cold chain solutions.

Education and Training Projects

Provision of industrial kitchen equipment to school canteens and restaurants

To offer students the possibility to have a proper meal during lunch and dinner time we offer to design, supply and install the following equipment in school canteens and restaurants:

- Food preparation equipment
- Cafe/restaurant equipment
- Dishwashing equipment
- Cooking equipment
- Bakery/pastry equipment
- Refrigeration equipment

Hotel and tourism training centres

World hospitality enterprises account for nine per cent of world GDP, or approximately 260 million jobs. New international hotels, resorts, spas and themed restaurants continue to open worldwide, offering a wealth of employment opportunities. This trend is also beginning to develop in many developing countries, who have discovered that this sector can be of vital importance for the economic growth and development of their country.

Accessing a tourism and hospitality career path has generally been an easy one due to the high staff demand around the globe. This situation remains and staff shortages in these industries remain a major headache for this industry sector. To solve this problem we offer our services to provide our clients with a turn-key solution for the provision of equipment, installation and training for specialized hospitality training centres. With the establishment of these training centres thousands of students can find new jobs in this sector.

GRAIDCO provides equipment, installation and training for the following subjects:

- Canteen
- Training Restaurant
- Laundry Room
- Housekeeping
- Fitness Room
- Culinary Art
- Training Bar
- Hotel Room Simulation
- Front Office Operations
- Classroom

Catering Equipment

GRAIDCO is able to provide a wide range of industrial kitchen, catering and food processing equipment. Thanks to the cooperation with several suppliers **GRAIDCO** is able to select the right product and quality for the client. In order to make sure that the supplied equipment matches exactly the needs of the project, our equipment can be composed in such a way that it can be used for a wide range of applications:

- Schools
- Hospitals
- Restaurants
- Government headquarters
- Bakeries
- Refugee camps
- UN fieldmissions
- Remote worker camps
- Training centres
- Food production

Our range of catering equipment consist of the following:

Food preparation

- Cutters
- Potato peelers
- Meat grinders
- Stainless steel tables
- Slicers
- Vacuum machines
- Bone saws

Cafe/restaurant

- Tea makers
- Coffee machines
- Crepe makers
- Milk dispensers
- Service units
- Hot water dispensers
- Toasters
- Panini grills
- Microwaves

Dishwasher

- Glasswashers
- Undercounter dishwashers
- Hood type dishwashers
- Conveyor type dishwashers
- Sinks

Cooking

- Ranges
- Pasta cookers
- Bain maries
- Tilting pans
- Fryers
- Grills
- Boiling pans
- Convection ovens

Bakery/Pastry

- Dough moulders
- Dough kneaders
- Dough dividers
- Dough rounders
- Baking ovens
- Strip mills
- Banguet trolleys
- Small bakeryware

Refrigeration

- Refrigerated/freezer counters
- Refrigerated/freezer cabinets
- Ice makers
- Bottle coolers
- Cold rooms

Mobile Solutions

These mobile solutions can be used in situations where there is no time or space to set up a regular kitchen. We offer an easily transportable mobile kitchen capable of catering to 150-600 people at a time. Compact and easy to transport, the mobile kitchen can be towed by any vehicle with a hitch assembly, and can be quickly and easily set up to provide a convenient and immediate catering solution where it is needed most, such as a warzone, disaster areas or remote locations.

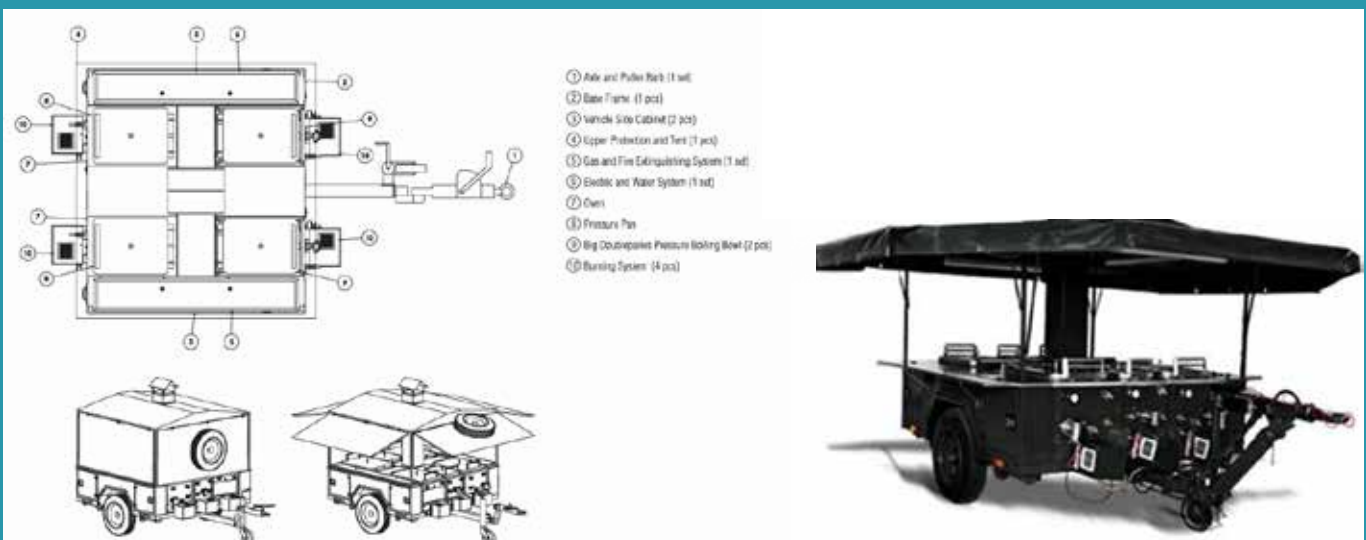

Mobile Trailer

This mobile trailer can be equipped with the following features:

- Food preparation equipment
- Cafe/restaurant equipment
- Dishwashing equipment
- Cooking equipment
- Bakery/pastry equipment
- Refrigeration equipment

Mobile Field Kitchen

Example of features on a 400 person field kitchen:

Portfolio

The portfolio of **GRAIDCO** goes further than the supply of Textile & Garment Equipment. Our current portfolio consists of the product groups mentioned below. Equipment can be supplied to you as single products but we can also look at the possibility for a turn-key approach, consisting of consultancy, supply of equipment, installation, commissioning and training.

Industrial Kitchen

Furniture

Textile & Garment

Bakery

Beauty & Care

Modular Solutions
